## PROJECTS

- **Childhood Snake Game (https://snake-omega-tan.vercel.app)**

Basic game of snake that we used to play during our childhood is reimagined and transformed into a responsive web page with all basic functionality made by using react and tailwind css with a beautiful ui and gameplay and deployed on vercel.

- **Weather Application (https://brave-aditya.github.io/weather)**

A responsive web page which can be used to check the weather forecast of any city of the world it also has some additional features and is made by using react, axios, weather API, css grid etc. and deployed on github pages.

- **Social Media Application (https://social-umber.vercel.app)**

It is also a responsive web page and full stack app with beautiful ui made by using react and nodejs and mysql. It is a complete social media application where you can follow users, post pics and texts and set up your user profile and much more, is authenticated by jwt.
Its frontend is hosted on vercel and backend on render and due to their free tier policy it takes around 15 seconds to load the app due to inactivity.

- **Portfolio Website (https://aditya-swart.vercel.app)**

A beautiful portfolio website made with next js and tailwind css which is having a beautiful ui with awesome animations and features such as download CV directly from website and can also all my projects from the website itself. It showcases all my knowledge and efforts with eye catching user interface. It is must to visit this site.
